DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a method of manufactured plated through holes, classified in class 29, subclass 842.
- II. Claims 20-24, drawn to a method of manufacturing conductive attachment wells, classified in class 29, subclass 842.
- III. Claims 25 and 26, drawn to a method of manufacturing twisted spring contacts, classified in class 29, subclass 842.

The inventions are distinct, each from the other because of the following reasons:

Groups I and III are separate and distinct from Group II inasmuch as Groups I and III do not require a casting material as Group II does require; Group I is separate and distinct from Group III inasmuch as Group III requires a wire twisting step which is not required by Group I invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3729

Because these inventions are distinct for the reasons given above and the searches required for Groups are divergent.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to C. J. Arbes at telephone number 571-272-4563.
